

KARTAVYA – “An effort towards educated

KARTAVYA is an NGO run and regulated by the students of NIFFT, Ranchi. We have two centres at HATIA and TUPUDANA in which we teach more than 100 students. It was established in the year 2007, with an objective to bridge the inequity existing in our society through education. We equip these children with knowledge, skills and mindset to succeed in every endeavour of their lives.

MISSION

The aim of our organisation is to provide elementary education to the underprivileged sections of our society. We started our mission with two children and now we are educating more than hundred students.

What do we do?

- We conduct evening classes of our students after their schools.
- We admit students in elementary schools.
- We bear the school fees of meritorious students with the help from our sponsors.
- We also provide basic facilities to support their education.
- We focus on overall development of our students by promoting dancing, debating, quizzing and other extra-curricular activities among students.
